

CREDO *reference*

Welcome to the Credo Reference Trial!

Credo Reference, formerly Xrefer, offers completely customizable online reference solutions for libraries. It features full-text, aggregated content from over 275 reference books from over 60 publishers, covering such subjects as medicine, art, technology, history and more. Credo continually adds new content in all subjects, with such notable recent additions as the *Bridgeman Art Library Archive*, with over 16,000 art images and the interactive *Hutchinson Unabridged Encyclopedia including Atlas*. The collection includes encyclopedias, dictionaries and thesauri, as well as subject-specific titles.

Credo enriches the content by adding a unique network of cross-references that cut across topics, titles and publishers, to add context to results and enable further discovery. Also included are cross-searchable images, maps and sound files; customizable data tables; interactive, visual displays of search results; and a citation formatter with multiple citation styles.

Credo Reference includes over 3 million entries, 160,000+ images (art, diagrams, maps and photos), and over 206,000 audio pronunciation files. Subscribing libraries also enjoy unlimited simultaneous users, remote access, detailed usage reports and free downloadable MARC records.
